

Resource Monitoring System FRD

Module 1: Organization Setup

Purpose

To define the company structure required for resource monitoring, reporting, ownership, allocation visibility, and department-level accountability.

Business Objective

Management should clearly know how employees are grouped, who owns each team, and how utilization should be reported across departments, teams, and business functions.

Dependencies

Employee Management, Resource Allocation, Dashboards, Reports, RBAC.

Sr No.	FR ID	Sub Module	Feature Title	Functional Requirement	Priority	Remarks
1	FR-001	Department	Create Department	Admin can create departments such as Product, Delivery, Support, Sales, BD, Automation, Development, QA, HR, Finance and Management.	Must	Master
2	FR-002	Department	Department Code	Each department shall have a unique department code for reporting and import purposes.	Must	Validation
3	FR-003	Department	Department Name	Department name shall be mandatory and unique.	Must	Validation
4	FR-004	Department	Department Description	Admin can add a short description explaining the department's business role.	Should	Optional
5	FR-005	Department	Department Head	Admin can assign one employee as department head.	Must	Ownership
6	FR-006	Department	Edit Department	Admin can edit department name, description and department head.	Must	Controlled
7	FR-007	Department	Disable Department	Admin can disable a department when it is no longer active. Existing history shall remain available.	Must	No hard delete
8	FR-008	Department	Prevent Duplicate Department	System shall not allow duplicate department names or codes.	Must	Validation

9	FR-009	Department	Prevent Department Deletion	Department shall not be deleted if employees, projects, teams or allocation records are linked to it.	Must	Business Rule
10	FR-010	Department	Department List View	Users with permission can view department list with code, name, head, status and employee count.	Must	Listing
11	FR-011	Department	Department Search	Users can search departments by code, name or department head.	Should	Usability
12	FR-012	Department	Department Filter	Users can filter departments by Active or Inactive status.	Should	Usability
13	FR-013	Team	Create Team	Admin can create teams under a department. Example: Backend, Frontend, Mobile, QA, Implementation, L1 Support.	Must	Master
14	FR-014	Team	Team Code	Each team shall have a unique team code.	Should	Reporting
15	FR-015	Team	Team Name	Team name shall be mandatory within a department.	Must	Validation
16	FR-016	Team	Team Lead	Admin can assign one team lead for each team.	Must	Ownership
17	FR-017	Team	Edit Team	Admin can modify team name, code, description and team lead.	Must	Controlled
18	FR-018	Team	Disable Team	Admin can disable a team without affecting historical allocation and utilization data.	Must	No hard delete
19	FR-019	Team	Prevent Team Deletion	Team shall not be deleted if employees or historical transactions exist.	Must	Business Rule
20	FR-020	Team	Team List View	Users with permission can view teams with department, team lead, status and employee count.	Must	Listing
21	FR-021	Team	Team Search	Users can search teams by team name, code, department or team lead.	Should	Usability
22	FR-022	Designation	Create Designation	Admin can create designations such as Developer, Senior Developer, QA Engineer, Project Manager, Support Executive, Sales Manager.	Must	Master
23	FR-023	Designation	Designation Level	Admin can optionally define designation level such as Junior, Mid, Senior, Lead, Manager or Head.	Should	Reporting
24	FR-024	Designation	Edit Designation	Admin can edit designation name and level.	Must	Controlled
25	FR-025	Designation	Disable Designation	Admin can disable unused designations while retaining employee history.	Must	No hard delete

26	FR-026	Designation	Prevent Duplicate Designation	Duplicate designation names shall not be allowed.	Must	Validation
27	FR-027	Location	Office Location Master	Admin can maintain office locations if company operates from multiple offices or remote hubs.	Should	Optional
28	FR-028	Location	Work Location Type	System shall support location types such as Office, Remote, Hybrid and Client Site.	Should	Useful for planning
29	FR-029	Calendar	Working Days	Admin can define company working days such as Monday to Friday or Monday to Saturday.	Must	Availability
30	FR-030	Calendar	Working Hours	Admin can define standard working hours per day.	Must	Capacity calculation
31	FR-031	Calendar	Holiday Calendar	Admin can maintain yearly company holiday calendar.	Must	Availability
32	FR-032	Calendar	Department-Specific Calendar	Admin can optionally maintain department-specific working calendar if some teams follow different schedules.	Could	Optional
33	FR-033	Calendar	Calendar Effective Date	Working calendar changes shall be effective from a defined date and shall not overwrite past capacity calculations.	Must	Historical accuracy
34	FR-034	Import	Master Import	Admin can import departments, teams, designations and locations through Excel/CSV.	Should	Faster setup
35	FR-035	Export	Master Export	Admin can export organization masters for review or backup.	Should	Utility
36	FR-036	Audit	Master Audit Trail	Changes in department, team, designation and calendar masters shall be logged with user, date and old/new values.	Must	Control

Business Rules

BR ID	Business Rule
BR-001	Department, team and designation records shall be disabled, not physically deleted.
BR-002	Employee allocation reports shall always use the department/team applicable during that allocation period.
BR-003	Inactive departments and teams shall not be available for new employee assignment.
BR-004	Only active employees can be assigned as department head or team lead.
BR-005	Calendar changes shall not recalculate past utilization unless explicitly reprocessed by admin.

Exception Handling

Scenario	Expected Handling
Duplicate department entered	Show validation message: “Department already exists.”
User tries deleting linked department	Show message with linked employee/project count.
Inactive team selected for employee	System shall block selection.
Calendar missing for period	System shall use default company calendar and flag exception to admin.

Module 2: Employee Management

Purpose

To maintain only those employee details required for resource allocation, utilization tracking, reporting hierarchy, skill visibility and management decision-making.

Business Objective

Management should know each employee’s department, manager, role, status, capacity, skills and current allocation position without maintaining a heavy HRMS.

Dependencies

Organization Setup, Skills, Resource Allocation, Leave, Timesheet, Dashboards, Reports, RBAC.

Sr No.	FR ID	Sub Module	Feature Title	Functional Requirement	Priority	Remarks
37	FR-037	Employee Profile	Create Employee	HR/Admin can create an employee with code, name, email, department, team, designation, manager, joining date and employment status.	Must	Core
38	FR-038	Employee Profile	Employee Code	Employee code shall be mandatory and unique across active and inactive employees.	Must	Validation
39	FR-039	Employee Profile	Employee Name	Employee full name shall be mandatory.	Must	Validation
40	FR-040	Employee Profile	Official Email	Official email shall be mandatory and unique.	Must	Login/communication
41	FR-041	Employee Profile	Mobile Number	Mobile number can be maintained for operational communication.	Should	Optional
42	FR-042	Employee Profile	Profile Photo	Employee photo may be uploaded for quick visual identification.	Could	Optional

43	FR-043	Employment	Joining Date	Joining date shall be mandatory and used for availability and tenure reports.	Must	Reporting
44	FR-044	Employment	Employment Type	System shall support Permanent, Contract, Intern and Consultant employee types.	Must	Classification
45	FR-045	Employment	Employment Status	System shall support Active, Notice Period, Long Leave, Inactive and Exited statuses.	Must	Planning
46	FR-046	Employment	Last Working Date	Last working date shall be captured when employee status changes to Exited.	Must	Exit handling
47	FR-047	Employment	Notice Period Flag	Employees on notice period shall be clearly marked in allocation and availability views.	Must	Management visibility
48	FR-048	Employment	Long Leave Flag	Employees on long leave shall not appear as available resources during leave period.	Must	Capacity
49	FR-049	Organization Mapping	Department Assignment	Every active employee shall be mapped to one active department.	Must	Validation
50	FR-050	Organization Mapping	Team Assignment	Every active employee shall be mapped to one active team within the assigned department.	Must	Validation
51	FR-051	Organization Mapping	Designation Assignment	Every active employee shall have one active designation.	Must	Reporting
52	FR-052	Organization Mapping	Reporting Manager	Every active employee shall have one reporting manager except top management users.	Must	Hierarchy
53	FR-053	Organization Mapping	Functional Manager	System may allow an optional functional manager for matrix structure.	Should	Optional
54	FR-054	Organization Mapping	Department Transfer	HR/Admin can transfer employee from one department to another with effective date.	Must	History
55	FR-055	Organization Mapping	Team Transfer	HR/Admin can transfer employee from one team to another with effective date.	Must	History
56	FR-056	Organization Mapping	Manager Change	HR/Admin can change reporting manager with effective date.	Must	History
57	FR-057	Organization Mapping	Designation Change	HR/Admin can change designation with effective date.	Should	History
58	FR-058	Capacity	Standard Capacity	Each active employee shall have standard daily capacity based on company working calendar.	Must	Capacity planning
59	FR-059	Capacity	Custom Capacity	Admin can define custom capacity for part-time, intern, consultant or special cases.	Should	Useful

60	FR-060	Capacity	Capacity Effective Date	Custom capacity shall have effective start and end date.	Must	Historical accuracy
61	FR-061	Costing	Internal Cost Rate	Admin may maintain internal monthly or hourly cost rate for management analysis.	Could	Optional
62	FR-062	Costing	Billing Rate	Admin may maintain billing rate for billable employees.	Could	Optional
63	FR-063	Costing	Cost Visibility Permission	Cost and billing rates shall be visible only to authorized roles.	Must	Security
64	FR-064	Employee View	Employee Detail Page	Authorized users can view employee profile, skills, allocations, availability, manager and employment status in one page.	Must	Core screen
65	FR-065	Employee View	Current Allocation Summary	Employee page shall show current allocation percentage and active projects.	Must	Management visibility
66	FR-066	Employee View	Future Allocation Summary	Employee page shall show confirmed future allocations.	Must	Planning
67	FR-067	Employee View	Availability Summary	Employee page shall show availability for next 7, 30, 60 and 90 days.	Must	Planning
68	FR-068	Employee View	Skill Summary	Employee page shall show primary skill, secondary skills and skill rating.	Must	Search support
69	FR-069	Employee View	Employee Timeline	Employee page shall show important changes such as department transfer, manager change, status change and allocation changes.	Should	Audit clarity
70	FR-070	Search	Employee Search	Users can search employees by name, code, email or manager.	Must	Usability
71	FR-071	Search	Filter by Department	Users can filter employee list by department.	Must	Usability
72	FR-072	Search	Filter by Team	Users can filter employee list by team.	Must	Usability
73	FR-073	Search	Filter by Status	Users can filter employees by Active, Notice Period, Long Leave, Inactive or Exited.	Must	Usability
74	FR-074	Search	Filter by Employment Type	Users can filter employees by Permanent, Contract, Intern or Consultant.	Should	Usability
75	FR-075	Search	Filter by Manager	Users can view all employees reporting to a selected manager.	Must	Manager view

76	FR-076	Bulk Operations	Employee Import	HR/Admin can import employees through Excel/CSV using predefined template.	Should	Faster setup
77	FR-077	Bulk Operations	Import Validation	Import shall validate duplicate codes, invalid departments, invalid teams and missing mandatory fields before upload.	Must	Data quality
78	FR-078	Bulk Operations	Import Error File	System shall generate error file for failed import rows with reason.	Should	Usability
79	FR-079	Bulk Operations	Employee Export	Authorized users can export employee list based on applied filters.	Should	Utility
80	FR-080	Status Change	Mark Employee Inactive	HR/Admin can mark an employee inactive with effective date and reason.	Must	Control
81	FR-081	Status Change	Exit Employee	HR/Admin can mark employee exited by entering last working date.	Must	Exit handling
82	FR-082	Status Change	Active Allocation Check on Exit	System shall warn if exiting employee has active or future allocations.	Must	Business Rule
83	FR-083	Status Change	Block New Allocation for Exited Employee	Exited employees shall not be available for new allocation.	Must	Business Rule
84	FR-084	Audit	Employee Audit Trail	All key employee changes shall be logged with old value, new value, user and timestamp.	Must	Audit
85	FR-085	Access	Employee Self View	Employee can view own profile, reporting manager, skills, allocations and availability.	Should	Self service

Business Rules

BR ID	Business Rule
BR-006	Employee Code and Official Email must remain unique.
BR-007	Active employees must belong to active department, active team and active designation.
BR-008	Exited employees cannot receive new allocations.
BR-009	Notice period employees can be allocated only until their last working date.
BR-010	Long leave employees shall be excluded from available resource lists during leave period.
BR-011	Historical department/team/manager changes shall not overwrite past utilization reports.
BR-012	Cost and billing rate fields shall be permission controlled.

Exception Handling

Scenario	Expected Handling
----------	-------------------

Duplicate employee code	Show message: “Employee Code already exists.”
Employee exit with active allocation	Show warning with project list and require allocation closure or override permission.
Invalid department in import	Reject row and show reason in import error file.
Manager marked inactive	System shall warn admin to reassign reportees.
Employee capacity missing	System shall use default company working capacity.

Module 3: Skills & Competency

Purpose

To maintain lightweight skill visibility so managers can find available people by skill, identify dependency risks and plan staffing without creating a complex competency management system.

Business Objective

Management should know which skills are available, who owns them, how strong the capability is, and whether any project depends on a single person.

Dependencies

Employee Management, Resource Allocation, Capacity Planning, Dashboards, Reports.

Sr No.	FR ID	Sub Module	Feature Title	Functional Requirement	Priority	Remarks
86	FR-086	Skill Master	Create Skill	Admin can create skills such as React, Node.js, PostgreSQL, AWS, Flutter, QA Manual, Automation, DevOps and Keycloak.	Must	Master
87	FR-087	Skill Master	Skill Category	Each skill can be grouped under category such as Frontend, Backend, Mobile, Database, Cloud, QA, Sales or Support.	Must	Reporting
88	FR-088	Skill Master	Skill Code	Each skill may have a unique skill code for import and reporting.	Should	Utility
89	FR-089	Skill Master	Edit Skill	Admin can edit skill name, category and description.	Must	Controlled
90	FR-090	Skill Master	Disable Skill	Admin can disable unused skills without affecting historical records.	Must	No hard delete
91	FR-091	Skill Master	Prevent Duplicate Skill	Duplicate skill names shall not be allowed within same skill category.	Must	Validation

92	FR-092	Employee Skill	Assign Primary Skill	Each employee shall have one primary skill.	Must	Core
93	FR-093	Employee Skill	Assign Secondary Skills	Each employee can have multiple secondary skills.	Must	Core
94	FR-094	Employee Skill	Skill Proficiency	Each assigned skill can have proficiency level: Beginner, Working, Strong, Expert.	Must	Practical rating
95	FR-095	Employee Skill	Skill Experience	Each assigned skill can capture experience in years or months.	Must	Search
96	FR-096	Employee Skill	Recent Usage Flag	Manager can mark whether the employee has used the skill recently.	Should	Practical accuracy
97	FR-097	Employee Skill	Skill Remarks	Manager can add short remarks for skill context, such as “used in client project” or “learning stage”.	Should	Useful
98	FR-098	Employee Skill	Skill Updated By	System shall show who last updated employee skill information and when.	Must	Trust
99	FR-099	Employee Skill	Self Skill Update Request	Employee may request skill update, subject to manager approval.	Could	Optional
100	FR-100	Approval	Manager Skill Approval	Reporting manager can approve or reject employee-requested skill changes.	Could	Optional
101	FR-101	Search	Search by Skill	Managers can search employees by selected skill.	Must	Core
102	FR-102	Search	Multi-Skill Search	Managers can search employees having multiple required skills.	Must	Staffing
103	FR-103	Search	Skill Match Type	Search shall support “Any selected skill” and “All selected skills” options.	Must	Usability
104	FR-104	Search	Filter by Proficiency	Skill search can be filtered by minimum proficiency level.	Must	Staffing
105	FR-105	Search	Filter by Experience	Skill search can be filtered by minimum years of experience.	Must	Staffing
106	FR-106	Search	Filter by Availability	Skill search can be combined with current and future availability.	Must	Management effective
107	FR-107	Search	Filter by Department	Skill search can be filtered by department.	Should	Usability
108	FR-108	Search	Filter by Employment Status	Skill search shall exclude inactive/exited employees by default.	Must	Business Rule

109	FR-109	Search	Skill Search Result	Search result shall show employee name, department, primary skill, matching skills, allocation percentage and next availability.	Must	Decision-ready
110	FR-110	Search	Skill Availability View	Managers can view available employees for a selected skill in next 7, 30, 60 and 90 days.	Must	Planning
111	FR-111	Analytics	Skill Count Report	System shall show count of employees by skill and proficiency level.	Must	Management
112	FR-112	Analytics	Critical Skill Identification	System shall identify skills available with only one active employee.	Must	Risk
113	FR-113	Analytics	Skill Dependency Risk	System shall flag active projects depending on employees with rare skills.	Should	Management insight
114	FR-114	Analytics	Backup Skill Coverage	System shall show whether a project has at least one backup resource for key skills.	Should	Practical
115	FR-115	Analytics	Skill Gap View	System shall compare open resource demand against available employee skills.	Should	Planning
116	FR-116	Import	Skill Master Import	Admin can import skill master through Excel/CSV.	Should	Setup
117	FR-117	Import	Employee Skill Import	Admin can bulk upload employee skills through Excel/CSV.	Should	Useful
118	FR-118	Import	Skill Import Validation	Import shall validate invalid skill names, duplicate rows and missing employee codes.	Must	Data quality
119	FR-119	Export	Skill Export	Authorized users can export skill matrix by department, team, skill and proficiency.	Should	Utility
120	FR-120	Audit	Skill Audit Trail	Changes in skill master and employee skill mapping shall be logged with user, date and old/new value.	Must	Audit

Business Rules

BR ID	Business Rule
BR-013	Each active employee should have one primary skill.
BR-014	Disabled skills shall not be available for new employee skill mapping.
BR-015	Exited employees shall not appear in active skill availability search.
BR-016	Critical skill means skill available with only one active employee or no backup in current department.
BR-017	Skill proficiency shall use practical labels, not academic grades.
BR-018	Skill search must show allocation status along with skill match. Skill alone is not enough for staffing decision.

Exception Handling

Scenario	Expected Handling
Duplicate skill created	Show message: “Skill already exists in this category.”
Employee has no primary skill	Highlight employee in Skill Data Missing report.
Skill search has no available resource	Show unavailable matched resources and next availability date.
Import contains unknown skill	Reject row and mention invalid skill name.
Rare skill used in active project	Flag in Critical Skill Dependency report.

Module 4 – Project Portfolio Management

Purpose

To maintain all projects that consume organizational resources and provide management with complete visibility of project ownership, timeline, priority, staffing, health, and resource demand.

Business Objective

Management should be able to answer the following questions at any time:

- Which projects are active?
- Who owns each project?
- Which customer is it for?
- Which projects need more resources?
- Which projects are under-staffed?
- Which projects are finishing soon?
- Which projects are delayed due to resource shortage?

Dependencies

- Organization Setup
- Employee Management
- Skills & Competency
- Resource Planning & Allocation
- Dashboards
- Reports
- Notifications

Sr No.	FR ID	Sub Module	Feature Title	Functional Requirement	Priority	Remarks
--------	-------	------------	---------------	------------------------	----------	---------

121	FR-121	Project Master	Create Project	Project Manager or authorized user can create a project by defining project name, customer, owner, start date, planned end date and project type.	Must	Core
122	FR-122	Project Master	Unique Project Code	System shall generate or maintain a unique project code.	Must	Validation
123	FR-123	Project Master	Project Name	Project name shall be mandatory.	Must	Validation
124	FR-124	Project Master	Customer Name	Each project shall be linked to one customer or marked as Internal Project.	Must	Reporting
125	FR-125	Project Master	Project Category	System shall support Product Development, Customer Delivery, Support, Internal Initiative and Pre-Sales projects.	Must	Classification
126	FR-126	Project Master	Project Owner	Each project shall have one accountable Project Manager.	Must	Ownership
127	FR-127	Project Master	Business Unit	Project can optionally be linked to one business unit or department.	Should	Reporting
128	FR-128	Project Master	Project Description	Project description can be maintained.	Should	Reference
129	FR-129	Planning	Planned Start Date	Planned project start date shall be mandatory.	Must	Planning
130	FR-130	Planning	Planned End Date	Planned completion date shall be mandatory.	Must	Planning
131	FR-131	Planning	Actual Start Date	Actual project start date shall be captured separately.	Should	Variance
132	FR-132	Planning	Actual End Date	Actual completion date shall be captured on project closure.	Should	Reporting
133	FR-133	Planning	Project Duration	System shall automatically calculate project duration.	Must	Derived
134	FR-134	Status	Project Status	Project status shall support Proposed, Approved, Active, UAT, Support, On Hold, Completed and Cancelled.	Must	Core
135	FR-135	Status	Project Stage History	Every status change shall be recorded historically.	Must	Audit
136	FR-136	Priority	Project Priority	Projects shall support Critical, High, Medium and Low priority.	Must	Planning
137	FR-137	Priority	Priority Change	Priority changes shall be logged.	Should	Audit

138	FR-138	Commercial	Billable Project	Project can be marked Billable or Non-Billable.	Must	Reporting
139	FR-139	Commercial	Internal Project	Internal initiatives shall not require customer information.	Must	Business Rule
140	FR-140	Commercial	Customer Project	Customer projects shall require customer name.	Must	Validation
141	FR-141	Ownership	Delivery Manager	System can optionally maintain Delivery Manager.	Should	Reporting
142	FR-142	Ownership	Sponsor	Project Sponsor can be maintained.	Could	Optional
143	FR-143	Ownership	Department Ownership	Project shall belong to one owning department.	Must	Reporting
144	FR-144	Resource Planning	Estimated Team Size	Project shall maintain estimated team size.	Must	Planning
145	FR-145	Resource Planning	Current Team Size	System shall calculate current allocated resource count.	Must	Calculated
146	FR-146	Resource Planning	Vacancy Count	System shall calculate unfulfilled resource demand.	Must	Management
147	FR-147	Resource Planning	Skill Demand	Manager can define required skills for project.	Must	Planning
148	FR-148	Resource Planning	Skill Quantity	Manager can specify required quantity for each skill.	Must	Planning
149	FR-149	Resource Planning	Required By Date	Each resource demand shall include expected joining date.	Must	Planning
150	FR-150	Resource Planning	Resource Request Status	Demand shall support Requested, Approved, Fulfilled and Cancelled.	Must	Workflow
151	FR-151	Health	Project Health	Project Manager shall manually mark project health as Green, Amber or Red.	Must	Executive View
152	FR-152	Health	Health Remarks	Reason for Amber/Red status shall be mandatory.	Must	Visibility
153	FR-153	Health	Health History	Health changes shall be retained historically.	Should	Audit
154	FR-154	Milestone	Major Milestones	Project can maintain major milestones.	Should	Planning

155	FR-155	Milestone	Upcoming Milestones	Dashboard shall display upcoming milestones.	Should	Executive
156	FR-156	Risk	Resource Risk Flag	Manager can mark project at risk due to manpower shortage.	Must	Management
157	FR-157	Risk	Delay Reason	Manager can record reason for expected delay.	Should	Reporting
158	FR-158	Closure	Close Project	Project can be closed after all allocations are released.	Must	Business Rule
159	FR-159	Closure	Prevent Closure	System shall warn if active allocations exist during closure.	Must	Validation
160	FR-160	Archive	Archive Project	Completed projects can be archived while retaining history.	Must	No Delete
161	FR-161	Search	Search Project	Users can search projects by name, code or customer.	Must	Usability
162	FR-162	Search	Filter by Status	Projects can be filtered by status.	Must	Usability
163	FR-163	Search	Filter by Owner	Projects can be filtered by Project Manager.	Must	Usability
164	FR-164	Search	Filter by Department	Projects can be filtered by department.	Should	Reporting
165	FR-165	Search	Filter by Priority	Projects can be filtered by priority.	Should	Planning
166	FR-166	Search	Filter by Health	Projects can be filtered by Green/Amber/Red.	Must	Management
167	FR-167	Dashboard	Project Summary Card	Project card shall display status, health, team size, vacancies and completion date.	Must	Dashboard
168	FR-168	Dashboard	Overdue Projects	System shall identify overdue projects.	Must	Executive
169	FR-169	Dashboard	Projects Ending Soon	Projects ending within configurable days shall be highlighted.	Must	Planning
170	FR-170	Dashboard	Projects Waiting for Resources	Projects with pending manpower demand shall be highlighted.	Must	Management
171	FR-171	Import	Project Import	Projects can be imported through Excel.	Could	Utility

172	FR-172	Export	Project Export	Projects can be exported based on applied filters.	Should	Utility
173	FR-173	Audit	Audit Trail	All project changes shall be logged with old value, new value, user and timestamp.	Must	Audit

Business Rules

BR ID	Business Rule
BR-019	Every active project shall have one accountable Project Manager.
BR-020	Internal projects shall not require customer details.
BR-021	Customer projects shall require customer name.
BR-022	Completed projects cannot receive new resource allocations.
BR-023	Cancelled projects shall automatically release all future resource demand.
BR-024	Project cannot be closed while active allocations exist unless overridden by administrator.
BR-025	Amber and Red project health shall always require remarks.
BR-026	Resource demand shall always specify required skill and required-by date.

Exception Handling

Scenario	Expected System Behaviour
Duplicate project code	Display validation message and prevent save.
Project end date before start date	Reject transaction.
Attempt to close project with active resources	Display allocated employee list and block closure.
Project without owner	Prevent project activation.
Customer project saved without customer	Prevent save.
Red project health without remarks	Prevent save.
Required resource date already passed	Warn manager but allow save with justification.
Project archived accidentally	Only administrator can restore archived project.

Module 5 – Work Activity Management

Purpose

To classify every resource allocation into a standard business activity so that management can understand **where organizational effort is being spent** instead of only knowing **who is allocated**.

Business Objective

Management should be able to answer questions like:

- How much effort is spent on Product Development?
- How much effort is consumed by Customer Support?
- How much capacity goes into Internal Work?
- How much Presales work is happening?
- How much time is spent in Implementation?
- Which departments spend excessive effort on Meetings?

Dependencies

- Project Portfolio Management
- Employee Management
- Resource Planning & Allocation
- Dashboards
- Reports

Standard Activity Groups

The application shall be delivered with the following standard groups.

Product Engineering

- Product Development
- Feature Enhancement
- Bug Fixing
- Technical Debt
- R&D
- Architecture

Customer Delivery

- Implementation
- Configuration
- Custom Development
- Data Migration
- UAT Support
- Go Live
- Hypercare

Customer Support

- L1 Support
- L2 Support
- L3 Support

- Production Issue
- AMC Support

Quality

- Manual Testing
- Automation Testing
- Performance Testing
- Security Testing

Sales & Presales

- Demo
- POC
- Proposal
- Technical Discussion
- Customer Visit

Internal

- Training
- Recruitment
- Documentation
- Internal Meeting
- Management Review
- Process Improvement
- Innovation

Leave

- Planned Leave
- Sick Leave
- Holiday
- Compensatory Off

Sr No.	FR ID	Sub Module	Feature Title	Functional Requirement	Priority	Remarks
174	FR-174	Master	Standard Activity Library	System shall be delivered with predefined work activities grouped by business function.	Must	Core
175	FR-175	Master	Activity Group	Every activity shall belong to one activity group.	Must	Reporting
176	FR-176	Master	Activity Code	Each activity shall have a unique code.	Must	Validation

177	FR-177	Master	Activity Name	Activity name shall be mandatory.	Must	Validation
178	FR-178	Master	Activity Description	Short description can be maintained.	Should	Reference
179	FR-179	Master	Display Sequence	Activities shall have configurable display order.	Should	Usability
180	FR-180	Master	Default Activities	System shall install default activities during first setup.	Must	Implementation
181	FR-181	Master	Disable Activity	Unused activities can be disabled.	Must	No Delete
182	FR-182	Master	Prevent Delete	Referenced activities shall never be deleted.	Must	Business Rule
183	FR-183	Master	Prevent Duplicate	Duplicate activity names shall not be allowed within same group.	Must	Validation
184	FR-184	Classification	Billable Activity Flag	Activity can be marked Billable or Non-Billable.	Must	Reporting
185	FR-185	Classification	Customer Facing Flag	Activity can be identified as customer-facing.	Should	Analytics
186	FR-186	Classification	Capacity Consuming Flag	Activity shall indicate whether it consumes resource capacity.	Must	Planning
187	FR-187	Classification	Leave Activity Flag	Leave activities shall automatically reduce available capacity.	Must	Capacity
188	FR-188	Allocation	Activity Selection	Every allocation shall reference one activity.	Must	Core
189	FR-189	Allocation	Mandatory Activity	Allocation cannot be saved without activity selection.	Must	Validation
190	FR-190	Allocation	Allowed Activities	Only active activities shall be available for allocation.	Must	Business Rule
191	FR-191	Planning	Project Activities	Project-related activities shall require project selection.	Must	Validation
192	FR-192	Planning	Internal Activities	Internal activities shall allow allocation without customer project.	Must	Business Rule
193	FR-193	Planning	Leave Activities	Leave activities shall automatically block overlapping work allocation.	Must	Capacity

194	FR-194	Reporting	Activity Utilization	System shall calculate effort consumed by each activity.	Must	Management
195	FR-195	Reporting	Department Activity Split	System shall show effort distribution by department and activity.	Must	Management
196	FR-196	Reporting	Project Activity Split	System shall show effort distribution within each project by activity.	Should	Useful
197	FR-197	Reporting	Employee Activity Split	System shall show employee effort distribution across activities.	Must	Visibility
198	FR-198	Reporting	Billable vs Non-Billable	Activity reports shall distinguish billable and non-billable work.	Must	Management KPI
199	FR-199	Dashboard	Top Activities	Dashboard shall display organization effort distribution across top activities.	Must	Executive
200	FR-200	Dashboard	Internal Work Percentage	Dashboard shall display percentage of effort spent on internal work.	Must	Management
201	FR-201	Dashboard	Meeting Time Analysis	Dashboard shall display effort spent on meetings by department.	Should	Productivity
202	FR-202	Dashboard	Support Load	Dashboard shall display effort consumed by customer support activities.	Must	Operations
203	FR-203	Search	Search Activity	Users can search activities by name or group.	Should	Usability
204	FR-204	Import	Import Activities	Administrator may import additional activities.	Could	Optional
205	FR-205	Export	Export Activities	Activity library can be exported.	Could	Utility
206	FR-206	Audit	Audit Trail	Activity changes shall be logged.	Must	Audit

Business Rules

BR ID	Business Rule
BR-027	Every resource allocation must reference one activity.
BR-028	Leave activities shall always reduce available capacity.
BR-029	Project activities require project selection.
BR-030	Internal activities shall not require customer project.
BR-031	Disabled activities cannot receive new allocations.

BR-032	Historical allocations shall continue showing disabled activities.
BR-033	Activity groups are system-defined. Individual activities may be extended by administrators.

Exception Handling

Scenario	Expected System Behaviour
Allocation without activity	Reject transaction.
Disabled activity selected	Prevent save.
Duplicate activity name	Reject transaction.
Leave activity overlaps existing allocation	Warn user and prevent overlap unless explicitly permitted.
Project activity without project	Reject transaction.
Attempt to delete referenced activity	Block deletion and display linked allocation count.

Module 6 – Resource Planning & Allocation

Purpose

To provide a centralized planning engine that enables managers to allocate resources, forecast availability, identify conflicts, plan future staffing and optimize organizational capacity.

Business Objective

Management should be able to answer:

- Who is available today?
- Who becomes available next week?
- Can this project be staffed?
- Which project lacks manpower?
- Which employee is overloaded?
- Which employee is underutilized?
- Which skill will become a bottleneck?

Dependencies

- Organization Setup
- Employee Management
- Skills
- Project Portfolio

- Work Activity
- Leave Management
- Dashboard
- Reports

Sr	FR ID	Sub Module	Feature	Functional Requirement	Priority	Remarks
207	FR-207	Demand Planning	Create Resource Request	Project Manager can raise a manpower request for a project.	Must	Core
208	FR-208	Demand Planning	Required Skill	Each request shall specify required skill.	Must	
209	FR-209	Demand Planning	Required Quantity	Manager can request one or more resources.	Must	
210	FR-210	Demand Planning	Required Experience	Minimum experience can be specified.	Must	
211	FR-211	Demand Planning	Required Proficiency	Required proficiency level can be specified.	Should	
212	FR-212	Demand Planning	Required Start Date	Expected joining date shall be mandatory.	Must	
213	FR-213	Demand Planning	Expected End Date	Expected release date may be maintained.	Should	
214	FR-214	Demand Planning	Priority	Resource request shall support Critical, High, Medium and Low.	Must

268	FR-268	Planner	Manager Planner	Planning board for reporting manager.	Must	
269	FR-269	Planner	Organization Planner	Complete organization planner.	Must	
270	FR-270	Planner	Calendar View	Planner shall support Day, Week and Month views.	Must	
271	FR-271	Planner	Drag & Drop Allocation	Manager can drag allocation dates in planner.	Should	
272	FR-272	Planner	Color Indicators	Planner shall visually distinguish Available, Partial, Full, Leave and Overallocated resources.	Must	

Sr	FR ID	Sub Module	Feature	Functional Requirement	Priority	Remarks
273	FR-273	Executive	Upcoming Free Resources	System shall identify resources becoming available within configurable periods.	Must	
274	FR-274	Executive	Upcoming Skill Shortage	System shall identify future skill shortages based on approved demand versus confirmed capacity.	Must	
275	FR-275	Executive	Overallocated Resources	System shall list employees above configured utilization threshold.	Must	
276	FR-276	Executive	Underutilized Resources	System shall list employees below configured utilization threshold.	Must	
277	FR-277	Executive	Projects Awaiting Resources	Projects with approved but unfulfilled demand shall be highlighted.	Must	
278	FR-278	Executive	Hiring Indicator	System shall estimate hiring requirement when future demand cannot be met with confirmed internal capacity.	Should	
279	FR-279	Executive	Capacity Trend	System shall show utilization trend over time.	Should	
280	FR-280	Executive	Planning Summary	Executive dashboard shall summarize capacity, demand, shortages and bench position on a single screen.	Must	

Business Rules

BR ID	Business Rule
BR-034	Total allocation should normally remain within 100% of employee capacity.
BR-035	Hard allocation limit shall be configurable by administrator.
BR-036	Approved leave shall automatically reduce available capacity.
BR-037	Future allocations shall participate in future capacity calculations.
BR-038	Only active employees can be allocated.
BR-039	Only active projects can receive allocations.
BR-040	Only approved resource requests shall contribute to manpower demand.
BR-041	Released allocations shall immediately update organization capacity.
BR-042	Availability calculations shall always consider holidays, leave and future confirmed allocations.
BR-043	Managers shall only plan resources within their permission scope unless granted cross-department access.

Exception Handling

Scenario	Expected System Behaviour
Allocation exceeds capacity	Warn or block according to configured hard limit.
Resource already on leave	Display conflict and prevent or require override.
Allocation overlaps existing allocation	Highlight overlap before saving.
Project already completed	Reject allocation.
Employee inactive	Reject allocation.
Demand without required skill	Reject resource request.
Past allocation dates edited	Require elevated permission or maintain historical audit.
Resource released before project completion	Automatically recalculate vacancy count for the project.
Manager allocates outside permission scope	Reject transaction with authorization message.

Module 7 – Resource Availability & Forecasting

Purpose

To provide forward-looking visibility of organizational resource availability, enabling proactive staffing, hiring, project commitments and workload balancing.

Business Objective

Management should be able to answer:

- How many developers become available next month?
- Which teams will face shortages?
- Which skills will become unavailable?
- Can we accept a new project?
- Which employees remain idle?
- When should recruitment begin?
- What will utilization look like after three months?

Dependencies

- Employee Management
- Skills & Competency
- Project Portfolio
- Resource Planning & Allocation
- Leave Management
- Dashboard
- Reports

Sr	FR ID	Sub Module	Feature	Functional Requirement	Priority	Remarks
281	FR-281	Availability	Current Availability	System shall calculate currently available employees based on confirmed allocations, leave and capacity.	Must	Core
282	FR-282	Availability	7-Day Forecast	System shall forecast resource availability for the next 7 days.	Must	
283	FR-283	Availability	30-Day Forecast	System shall forecast resource availability for the next 30 days.	Must	
284	FR-284	Availability	60-Day Forecast	System shall forecast resource availability for the next 60 days.	Must	
285	FR-285	Availability	90-Day Forecast	System shall forecast resource availability for the next 90 days.	Must	
286	FR-286	Availability	Custom Date Forecast	Managers can forecast availability for any selected date.	Must	
287	FR-287	Availability	Available Capacity	Forecast shall show available hours and percentage.	Must	
288	FR-288	Availability	Committed Capacity	Forecast shall display already committed capacity separately.	Must	

289	FR-289	Availability	Reserved Capacity	Forecast shall display reserved (tentative) capacity separately from confirmed allocation.	Should	Supports future enhancement
290	FR-290	Availability	Forecast Calendar	Availability shall be presented in calendar and timeline views.	Must	

Sr	FR ID	Sub Module	Feature	Functional Requirement	Priority	Remarks
291	FR-291	Future Availability	Upcoming Free Resources	System shall identify employees whose confirmed allocation ends within a configurable period.	Must

323	FR-323	Forecast Engine	Automatic Refresh	Forecast shall refresh automatically after allocation, release, leave approval or project closure.	Must	
324	FR-324	Forecast Engine	Manual Refresh	Authorized users can trigger forecast recalculation manually.	Should	
325	FR-325	Forecast Engine	Forecast Timestamp	System shall display the last forecast generation timestamp.	Must	
326	FR-326	Forecast Engine	Forecast Version	System shall maintain forecast version for audit purposes when manually refreshed.	Could	

Business Rules

BR ID	Business Rule
BR-044	Forecast calculations shall consider only active employees.
BR-045	Approved leave shall reduce future availability automatically.
BR-046	Confirmed allocations shall take precedence over reserved allocations.
BR-047	Hiring recommendations are advisory and shall not create recruitment requests automatically.
BR-048	Forecasts shall include only approved resource demands by default.
BR-049	Archived or completed projects shall not contribute to future demand.
BR-050	Forecast shall always use the latest approved organizational calendar.

Exception Handling

Scenario	Expected System Behaviour
No future allocations exist	Show full available capacity with no shortages.
Resource demand without required date	Exclude from dated forecast and list as planning exception.
Forecast engine interrupted	Retain last successful forecast and notify administrator.
Employee becomes inactive after future allocation	Exclude employee from future availability and flag affected projects.
Holiday calendar changed	Automatically refresh future forecasts from the effective date onward.
Reserved and confirmed allocations exceed capacity	Highlight as overcommitted and require manager review.

Module 8 – Resource Utilization & Optimization

Purpose

To continuously monitor organizational resource utilization, identify idle or overloaded employees, optimize workload distribution, and improve overall workforce efficiency.

Business Objective

Management should be able to answer:

- Who is underutilized?
- Who is overloaded?
- Which departments have spare capacity?
- Which teams are consistently overworked?
- Which managers are balancing work effectively?
- Which skills remain idle?
- How efficiently is the organization utilizing its people?

Business Rules

BR ID	Business Rule
BR-051	Utilization shall be calculated using confirmed allocations only by default.
BR-052	Reserved allocations may optionally be included through configuration.
BR-053	Utilization thresholds shall be configurable by administrator.
BR-054	Organization, department and team utilization shall always use the same calculation methodology.
BR-055	Suggestions generated by the system are advisory and shall never automatically modify allocations.
BR-056	Historical utilization shall never change after allocation history is finalized.
BR-057	Manager rankings shall be based on balanced utilization rather than maximum utilization.

Exception Handling

Scenario	Expected System Behaviour
Employee without allocation	Include in underutilized resources with 0% utilization.
Employee allocated beyond configured threshold	Highlight as overloaded and notify responsible manager.
Department with no employees	Exclude from utilization calculations and show as N/A.
Employee transferred mid-period	Utilization shall be attributed according to effective dates.

Threshold changed by administrator	Future calculations shall use the new threshold; historical reports remain unchanged unless recalculated by an administrator.
Optimization recommendation not feasible due to skill mismatch	Do not suggest reassignment and record the reason internally.

Module 9 – Resource Availability Management

Purpose

To maintain all planned and unplanned events that reduce resource availability and ensure capacity planning reflects actual organizational commitments.

Business Objective

Management should know:

- Who is unavailable?
- Why are they unavailable?
- Until when?
- How does this affect project planning?
- Which projects will be impacted?
- Which departments lose capacity next month?

Dependencies

- Employee Management
- Project Portfolio
- Resource Planning & Allocation
- Resource Availability & Forecasting
- Dashboard
- Reports

Sr	FR ID	Sub Module	Feature	Functional Requirement	Priority	Remarks
381	FR-381	Availability	Category Master	System shall provide predefined availability block categories.	Must	Core

423	FR-423	Audit	Availability Audit	Availability block changes shall be audited.	Must	
424	FR-424	Audit	Reservation Audit	Reservation changes shall be audited.	Must	
425	FR-425	Audit	Conflict Audit	Resolved planning conflicts shall remain available for audit.	Should	

Business Rules

BR ID	Business Rule
BR-058	Availability blocks shall always reduce available planning capacity.
BR-059	Reservations shall reduce available capacity only if configured by administrator.
BR-060	Availability categories shall never be physically deleted.
BR-061	HRMS remains the system of record for leave approval where integrated.
BR-062	Only future availability blocks may be edited without administrative override.
BR-063	Availability conflicts shall never be resolved automatically.

Exception Handling

Scenario	Expected System Behaviour
Availability overlaps confirmed allocation	Warn manager and require resolution or override.
Reservation overlaps another reservation	Warn but allow if policy permits.
Imported leave conflicts with existing allocation	Create planning conflict and notify responsible manager.
Availability block exceeds employment period	Reject transaction.

Availability category disabled after transactions exist	Retain historical records while preventing new usage.
Forecast engine unavailable after availability update	Retain last forecast and queue recalculation automatically.

Module 10 – Work Confirmation

Purpose

To validate whether planned resource allocation was actually executed, while minimizing employee effort and avoiding traditional timesheet maintenance.

Business Objective

Management should know:

- Was planned work actually performed?
- Were major deviations reported?
- Which projects require replanning?
- Which allocations were not executed?
- Which employees need allocation correction?

Dependencies

- Employee Management
- Project Portfolio
- Work Activity
- Resource Planning & Allocation
- Resource Availability
- Dashboard
- Reports

Sr	FR ID	Sub Module	Feature	Functional Requirement	Priority	Remarks
426	FR-426	Planned Work	Today's Work	Employee shall view today's planned allocations based on approved resource plan.	Must	Core

468	FR-468	Audit	Confirmation Audit	Work confirmations shall be audited.	Must	
469	FR-469	Audit	Deviation Audit	Deviation changes shall be audited.	Must	
470	FR-470	Audit	Manager Action Audit	Manager decisions shall be audited.	Must	

Business Rules

BR ID	Business Rule
BR-064	Employees confirm work only against planned allocations.
BR-065	Detailed daily hour entry is not mandatory.
BR-066	Manager approval is required only for reported deviations, not for routine confirmations.
BR-067	Planning accuracy shall be calculated from confirmed work versus planned allocation.
BR-068	Repeated deviations should trigger planning review, not employee performance assessment.
BR-069	System shall minimize employee data entry wherever possible.

Exception Handling

Scenario	Expected System Behaviour
Employee has no planned allocation	Display "No planned work available" and allow optional exception reporting if work was performed.
Employee forgets confirmation	Manager dashboard shall show pending confirmation; reminder notification may be sent.
Employee reports work on an unplanned project	Record deviation and notify the responsible manager for review.
Manager rejects a deviation	Employee can provide additional clarification or the manager can correct the future allocation.
Allocation changed after confirmation	Preserve the original confirmation as history and apply the change only prospectively.
Repeated deviations for the same employee/project	Surface the pattern in Planning Intelligence rather than treating each instance in isolation.

Module 11 – Management Dashboard

Purpose

To provide a single management cockpit that delivers organization-wide visibility, highlights exceptions, recommends actions, and supports proactive decision-making across projects, departments, and resources.

Business Objective

Management should be able to answer within **30 seconds**:

- What requires my attention today?
- Where are the resource bottlenecks?
- Can we accept a new project?
- Which managers need support?
- Which projects are at risk?
- Which resources become available soon?
- Where should hiring begin?
- What changed since yesterday?

Dependencies

Consumes information from **all previous modules**.

Sr	FR ID	Sub Module	Feature	Functional Requirement	Priority	Remarks
471	FR-471	Executive Dashboard	Home	Executive Landing Page	System shall provide a single executive landing page summarizing organization health.	Must
472	FR-472	Executive Dashboard	Home	Role-Based Dashboard	Dashboard content shall vary based on user role (CEO, Delivery Head, Department Head, Manager).	Must
473	FR-473	Executive Dashboard	Home	Configurable Date Range	Dashboard shall support Today, Week, Month, Quarter and Custom period.	Must
474	FR-474	Executive Dashboard	Home	Organization Snapshot	Dashboard shall display organization-wide workforce summary.	Must
475	FR-475	Executive Dashboard	Home	Last Refresh Time	Dashboard shall display latest data refresh timestamp.	Must

Sr	FR ID	Sub Module	Feature	Functional Requirement	Priority	Remarks
476	FR-476	Executive Dashboard	KPI	Total Employees	Display total active employees.	Must
477	FR-477	Executive Dashboard	KPI	Allocated Resources	Display currently allocated employees.	Must
478	FR-478	Executive Dashboard	KPI	Available Resources	Display employees available for immediate allocation.	Must
479	FR-479	Executive Dashboard	KPI	Reserved Resources	Display employees reserved for future opportunities.	Should
480	FR-480	Executive Dashboard	KPI	Unavailable Resources	Display employees unavailable due to approved blocks.	Must
481	FR-481	Executive Dashboard	KPI	Organization Utilization	Display overall utilization percentage.	Must
482	FR-482	Executive Dashboard	KPI	Open Resource Demand	Display pending resource demand.	Must
483	FR-483	Executive Dashboard	KPI	Projects at Risk	Display count of projects marked Amber/Red.	Must
484	FR-484	Executive Dashboard	KPI	Deployable Capacity	Display employees available now, in 30, 60 and 90 days.	Must
485	FR-485	Executive Dashboard	KPI	Planning Accuracy	Display planning accuracy score.	Should

Sr	FR ID	Sub Module	Feature	Functional Requirement	Priority	Remarks
486	FR-486	Action Centre	Critical Items	Display highest-priority management actions requiring immediate attention.	Must	Core
487	FR-487	Action Centre	Upcoming Project Shortage	Highlight projects likely to face manpower shortage.	Must	
488	FR-488	Action Centre	Upcoming Idle Resources	Highlight employees becoming idle soon.	Must	
489	FR-489	Action Centre	Overloaded Resources	Highlight employees consistently overloaded.	Must	
490	FR-490	Action Centre	Critical Skill Risk	Highlight projects dependent on scarce skills.	Must	
491	FR-491	Action Centre	Pending Manager Decisions	Display pending approvals and reviews requiring manager action.	Should	
492	FR-492	Action Centre	Hiring Recommendation	Highlight skills where hiring should start now.	Should	
493	FR-493	Action Centre	Planning Exceptions	Display unresolved planning conflicts.	Must	
494	FR-494	Action Centre	Top 10 Priorities	Display only top configurable priority actions.	Must	
495	FR-495	Action Centre	Drill Down	Each action shall support drill-down to underlying records.	Must	

Sr	FR ID	Sub Module	Feature	Functional Requirement	Priority	Remarks
496	FR-496	Department Dashboard	Department Summary	Display utilization and availability by department.	Must	
497	FR-497	Department Dashboard	Department Capacity	Display remaining deployable capacity.	Must	
498	FR-498	Department Dashboard	Department Demand	Display department-wise manpower demand.	Must	
499	FR-499	Department Dashboard	Department Health	Display department planning health.	Should	
500	FR-500	Department Dashboard	Department Ranking	Rank departments by balanced utilization.	Should	

Sr	FR ID	Sub Module	Feature	Functional Requirement	Priority	Remarks
501	FR-501	Project Cockpit	Project Health	Display project health summary.	Must	
502	FR-502	Project Cockpit	Resource Position	Display allocated versus required resources.	Must	
503	FR-503	Project Cockpit	Demand Gap	Display pending manpower demand.	Must	
504	FR-504	Project Cockpit	Upcoming Releases	Display resources releasing from projects soon.	Should	
505	FR-505	Project Cockpit	Project Timeline	Display milestone timeline.	Should	

Sr	FR ID	Sub Module	Feature	Functional Requirement	Priority	Remarks
506	FR-506	Workforce Insight	Skill Heat Map	Display skill availability heat map.	Must	
507	FR-507	Workforce Insight	Skill Dependency	Display dependency on critical skills.	Must	
508	FR-508	Workforce Insight	Manager Workload	Display manager-wise workload distribution.	Should	
509	FR-509	Workforce Insight	Idle Trend	Display trend of underutilized resources.	Should	
510	FR-510	Workforce Insight	Overload Trend	Display trend of overloaded resources.	Should	
511	FR-511	Workforce Insight	Capacity Trend	Display organization capacity trend.	Must	

Sr	FR ID	Sub Module	Feature	Functional Requirement	Priority	Remarks
512	FR-512	Forecast	30-Day Forecast	Display 30-day workforce forecast.	Must	
513	FR-513	Forecast	60-Day Forecast	Display 60-day workforce forecast.	Must	
514	FR-514	Forecast	90-Day Forecast	Display 90-day workforce forecast.	Must	
515	FR-515	Forecast	Hiring Outlook	Display estimated hiring outlook.	Should	
516	FR-516	Forecast	Upcoming Capacity Loss	Display forecasted capacity reduction.	Must	

Sr	FR ID	Sub Module	Feature	Functional Requirement	Priority	Remarks
517	FR-517	Navigation	Drill Down	Every dashboard card shall support drill-down.	Must	
518	FR-518	Navigation	Saved Views	Users may save personalized dashboard layouts.	Could	
519	FR-519	Navigation	Favorites	Users may bookmark frequently used dashboard views.	Could	

520	FR-520	Navigation	Quick Search	Dashboard shall support global quick search.	Should	
-----	--------	------------	--------------	--	--------	--

Sr	FR ID	Sub Module	Feature	Functional Requirement	Priority	Remarks
521	FR-521	Performance	Response Time	Dashboard should load within configurable performance targets under normal operating conditions.	Must	
522	FR-522	Performance	Background Refresh	Dashboard data may refresh in background without full page reload.	Should	
523	FR-523	Performance	Caching	Frequently accessed dashboard summaries may be cached.	Should	
524	FR-524	Performance	Mobile View	Dashboard shall be optimized for tablet and desktop views.	Must	

Business Rules

BR ID	Business Rule
BR-070	Dashboard shall show only information permitted by the user's role and data scope.
BR-071	Executive Action Centre shall prioritize actionable exceptions over informational metrics.
BR-072	Deployable Capacity shall exclude unavailable resources and consider confirmed allocations.
BR-073	Every KPI card shall support drill-down unless restricted by security permissions.
BR-074	Dashboard calculations shall use the latest approved planning data and indicate the last refresh timestamp.
BR-075	Executive dashboards should present a concise view first, with details available through drill-down rather than overcrowding the landing page.

Exception Handling

Scenario	Expected System Behaviour
No projects exist	Display workforce KPIs and indicate that no active projects are available.
User has no permission for department data	Hide restricted cards and drill-down options.
Forecast data not yet generated	Display last available forecast with a clear freshness indicator.
Dashboard widget fails to load	Show the remaining dashboard and identify the affected widget without blocking the page.
Underlying data changes during viewing	Reflect updates on the next refresh cycle while preserving the current session view.

Module 12 – Management Reports & Analytics

Purpose

To provide structured, exportable, and actionable reports that help management monitor workforce utilization, staffing, project health, and planning without requiring manual spreadsheet analysis.

Business Objective

Management should be able to:

- Review historical performance.
- Compare departments, managers and projects.
- Identify trends.
- Support planning meetings.
- Export reports for customers or leadership.
- Make staffing and hiring decisions.

Dependencies

Consumes data from all previous modules.

Sr	FR ID	Sub Module	Feature	Functional Requirement	Priority	Remarks
525	FR-525	Report Center	Central Repository	System shall provide a centralized report catalog grouped by business area.	Must	Core
526	FR-526	Report Center	Report Categories	Reports shall be categorized as Executive, Department, Project, Resource, Forecast and Audit.	Must	
527	FR-527	Report Center	Search Reports	Users can search reports by name or category.	Must	
528	FR-528	Report Center	Favorite Reports	Users can mark reports as favorites.	Should	
529	FR-529	Report Center	Recently Used	Recently accessed reports shall be displayed.	Should	

Sr	FR ID	Sub Module	Feature	Functional Requirement	Priority	Remarks

Business Rules

BR ID	Business Rule
BR-076	All reports shall respect the user's role and data access permissions.
BR-077	Reports shall use consistent calculation logic with the Management Cockpit.
BR-078	Scheduled reports shall execute using the saved filters and security context of the report owner.
BR-079	Exception reports shall prioritize unresolved issues over historical data.
BR-080	Exports shall include only data visible to the requesting user.

Exception Handling

Scenario	Expected System Behaviour
Report returns no records	Display "No data available" with applied filters rather than an error.
User requests unauthorized report	Hide the report or deny access with an authorization message.
Large report export	Generate asynchronously and notify the user when ready.
Scheduled report fails	Log the failure and notify the report owner.
Underlying data changes during report generation	Use a consistent data snapshot for that report run.

Module 13 – Platform Administration & Security

Purpose

To provide centralized administration, security, system configuration, integrations, audit, and operational controls required to securely operate the Resource Management Platform.

Business Objective

Platform administrators should be able to:

- Configure the application.
- Secure organizational data.
- Control user access.
- Integrate with enterprise systems.
- Monitor platform health.
- Maintain auditability.
- Operate the platform without developer intervention.

Dependencies

Applies to every previous module.

Sr	FR ID	Sub Module	Feature	Functional Requirement	Priority	Remarks
583	FR-583	User Management	Create User	Administrator can create platform users.	Must	Core
584	FR-584	User Management	Deactivate User	Administrator can deactivate users without deleting history.	Must	
585	FR-585	User Management	Reset Password	Administrator can reset user password or trigger password reset workflow.	Must	
586	FR-586	User Management	Force Password Change	Administrator may require password change on next login.	Should	
587	FR-587	User Management	User Search	Administrator can search users by name, email or role.	Must	
588	FR-588	User Management	User Status	System shall support Active, Locked and Inactive user statuses.	Must	

Sr	FR ID	Sub Module	Feature	Functional Requirement	Priority	Remarks
----	-------	------------	---------	------------------------	----------	---------

589	FR-589	RBAC	Role Master	Administrator can define application roles.	Must	
590	FR-590	RBAC	Permission Matrix	Permissions shall be assigned at module and action level (View, Create, Update, Delete, Export).	Must	
591	FR-591	RBAC	Role Assignment	Users may be assigned one or more roles.	Must	
592	FR-592	RBAC	Department Scope	Role permissions may be restricted to one or more departments.	Must	
593	FR-593	RBAC	Project Scope	Access may be limited to selected projects.	Should	
594	FR-594	RBAC	Manager Scope	Managers shall automatically access only their reporting hierarchy unless explicitly extended.	Must	
595	FR-595	RBAC	Read Only Role	System shall support read-only access for auditors and leadership.	Should	
596	FR-596	RBAC	Export Permission	Export capability shall be permission-controlled.	Must	

Sr	FR ID	Sub Module	Feature	Functional Requirement	Priority	Remarks
597	FR-597	Authentication	Login	System shall support secure username/password authentication.	Must	
598	FR-598	Authentication	SSO Support	Platform may integrate with enterprise Single Sign-On providers.	Should	Future-ready
599	FR-599	Authentication	Multi-Factor Authentication	Platform may support MFA for privileged users.	Should	
600	FR-600	Authentication	Session Timeout	Administrator can configure session timeout duration.	Must	
601	FR-601	Authentication	Concurrent Sessions	Administrator can control concurrent login policy.	Should	
602	FR-602	Authentication	Account Lock	Repeated failed login attempts shall lock the account according to policy.	Must	

Sr	FR ID	Sub Module	Feature	Functional Requirement	Priority	Remarks
603	FR-603	Configuration	Organization Settings	Administrator can configure organization-level settings.	Must	

604	FR-604	Configuration	Working Calendar	Administrator can maintain default organizational working calendar.	Must	
605	FR-605	Configuration	Utilization Thresholds	Administrator can configure healthy, underutilized and overloaded thresholds.	Must	
606	FR-606	Configuration	Allocation Limits	Administrator can configure soft and hard allocation limits.	Must	
607	FR-607	Configuration	Forecast Horizon	Administrator can configure forecast windows (30/60/90 days etc.).	Should	
608	FR-608	Configuration	Dashboard Defaults	Administrator can configure default dashboard widgets by role.	Should	

Sr	FR ID	Sub Module	Feature	Functional Requirement	Priority	Remarks
609	FR-609	Notifications	Notification Templates	Administrator can maintain notification templates.	Should	
610	FR-610	Notifications	Email Notifications	Platform shall support email notifications for key events.	Must	
611	FR-611	Notifications	In-App Notifications	Platform shall support in-application notifications.	Must	
612	FR-612	Notifications	Notification Preferences	Users may configure their notification preferences where permitted.	Should	
613	FR-613	Notifications	Escalation Rules	Platform may escalate unresolved actions based on configured rules.	Should	

Sr	FR ID	Sub Module	Feature	Functional Requirement	Priority	Remarks
614	FR-614	Audit	Login Audit	System shall record successful and failed login attempts.	Must	
615	FR-615	Audit	Master Data Audit	Changes to key master data shall be audited.	Must	
616	FR-616	Audit	Configuration Audit	Configuration changes shall be audited.	Must	
617	FR-617	Audit	Permission Audit	Role and permission changes shall be audited.	Must	
618	FR-618	Audit	Audit Search	Administrators can search audit records by user, date or module.	Should	
619	FR-619	Audit	Audit Export	Audit records can be exported by authorized users.	Should	

Sr	FR ID	Sub Module	Feature	Functional Requirement	Priority	Remarks
620	FR-620	Integration	HRMS Integration	Platform may integrate with external HRMS for employee and leave data.	Should	
621	FR-621	Integration	Project Tool Integration	Platform may integrate with project management systems for project synchronization.	Should	
622	FR-622	Integration	API Framework	Platform shall expose secure APIs for approved integrations.	Should	
623	FR-623	Integration	Import Scheduler	Administrator may configure scheduled data imports.	Could	
624	FR-624	Integration	Export Scheduler	Administrator may configure scheduled data exports.	Could	

Sr	FR ID	Sub Module	Feature	Functional Requirement	Priority	Remarks
625	FR-625	Operations	System Health	Administrator shall view platform health indicators.	Should	
626	FR-626	Operations	Background Jobs	Administrator can monitor scheduled background jobs.	Should	
627	FR-627	Operations	Error Log	Administrator can review application error logs.	Should	
628	FR-628	Operations	Maintenance Mode	Administrator may place the application into maintenance mode.	Could	
629	FR-629	Operations	Reference Data Refresh	Administrator can trigger controlled refresh of cached reference data where applicable.	Could	

Business Rules

BR ID	Business Rule
BR-081	All platform actions shall respect RBAC and data scope restrictions.
BR-082	Audit records shall be immutable once written.
BR-083	Deactivated users shall immediately lose access but historical ownership shall be retained.
BR-084	Configuration changes affecting calculations shall apply prospectively unless an administrator explicitly initiates recalculation.
BR-085	Integration failures shall not interrupt core application functionality.

Exception Handling

Scenario	Expected System Behaviour
User account locked	Display lock message and follow configured unlock policy.
Unauthorized access attempt	Deny access, log the event, and display an authorization message.
External integration unavailable	Continue core application processing and queue or retry integration according to configuration.
Configuration change conflicts with existing data	Warn administrator and require confirmation before applying the change.
Audit storage unavailable	Queue audit events temporarily and alert the administrator if persistence cannot be completed.

16	SCR-016	Resources	Skills	Skill Search	Find employees by skills.	Managers	Planning
17	SCR-017	Resources	Skills	Skill Availability Matrix	View available resources by skill.	Managers	Planning
18	SCR-018	Resources	Skills	Critical Skill Dashboard	Identify skill dependency risks.	Management	Insight

Module 4 – Project Portfolio

Sr. No.	Screen ID	Menu	Sub Menu	Screen Name	Purpose	Primary Users	Remarks
19	SCR-019	Projects	Portfolio	Project List	Search and manage projects.	PM, Delivery Head	Core
20	SCR-020	Projects	Portfolio	Project Details	Create/Edit project.	PM	Core
21	SCR-021	Projects	Portfolio	Project Resource Demand	Define manpower requirements.	PM	Planning
22	SCR-022	Projects	Portfolio	Project Health	Update and monitor project health.	PM	Executive
23	SCR-023	Projects	Portfolio	Project Timeline	View milestones and schedule.	PM	Planning

Module 5 – Work Activity

Sr. No.	Screen ID	Menu	Sub Menu	Screen Name	Purpose	Primary Users	Remarks
24	SCR-024	Projects	Activities	Activity Master	Maintain work activities.	Administrator	Master
25	SCR-025	Projects	Activities	Activity Utilization	Analyze effort by activity.	Managers	Analytics

Module 6 – Resource Planning & Allocation

Sr. No.	Screen ID	Menu	Sub Menu	Screen Name	Purpose	Primary Users	Remarks
26	SCR-026	Planning	Resource Planning	Planning Board	Central planning workspace for managers.	Managers	★★★★★★
27	SCR-027	Planning	Resource Planning	Allocation Details	Create/Edit allocations.	Managers	Core

28	SCR-028	Planning	Resource Planning	Resource Request	Raise manpower requests.	PM	Planning
29	SCR-029	Planning	Resource Planning	Allocation Calendar	Calendar-based allocation view.	Managers	Core
30	SCR-030	Planning	Resource Planning	Employee Planner	Timeline for one employee.	Managers	Core
31	SCR-031	Planning	Resource Planning	Project Planner	Timeline for one project.	Managers	Core
32	SCR-032	Planning	Resource Planning	Department Planner	Department-wide planning board.	Department Head	Planning
33	SCR-033	Planning	Resource Planning	Organization Planner	Organization-wide planning board.	Delivery Head	Executive
34	SCR-034	Planning	Resource Planning	Conflict Resolution	Resolve planning conflicts.	Managers	Exception

Module 7 – Resource Availability & Forecasting

Sr. No.	Screen ID	Menu	Sub Menu	Screen Name	Purpose	Primary Users	Remarks
35	SCR-035	Planning	Forecast	Availability Forecast	Forecast workforce availability.	Managers	Planning
36	SCR-036	Planning	Forecast	Demand vs Capacity	Compare future demand and supply.	Management	Executive
37	SCR-037	Planning	Forecast	Hiring Outlook	View projected hiring requirements.	Management	Planning
38	SCR-038	Planning	Forecast	Forecast Heat Map	Visualize future capacity.	Management	Analytics

Module 8 – Resource Utilization & Optimization

Sr. No.	Screen ID	Menu	Sub Menu	Screen Name	Purpose	Primary Users	Remarks
39	SCR-039	Planning	Optimization	Utilization Dashboard	Monitor utilization across the organization.	Management	Core
40	SCR-040	Planning	Optimization	Underutilized Resources	Identify idle resources.	Managers	Action
41	SCR-041	Planning	Optimization	Overloaded Resources	Identify overloaded resources.	Managers	Action
42	SCR-042	Planning	Optimization	Optimization Recommendations	Review workload balancing suggestions.	Managers	Decision Support

Module 9 – Resource Availability Management

Sr. No.	Screen ID	Menu	Sub Menu	Screen Name	Purpose	Primary Users	Remarks
---------	-----------	------	----------	-------------	---------	---------------	---------

43	SCR-043	Resources	Availability	Availability Calendar	Manage and view availability blocks.	Managers	Core
44	SCR-044	Resources	Availability	Availability Block	Create/Edit availability blocks.	Managers	Core
45	SCR-045	Resources	Availability	Resource Reservations	Reserve resources for future work.	Managers	Planning
46	SCR-046	Resources	Availability	Availability Conflicts	Resolve scheduling conflicts.	Managers	Exception

Module 10 – Work Confirmation

Sr. No.	Screen ID	Menu	Sub Menu	Screen Name	Purpose	Primary Users	Remarks
47	SCR-047	My Workspace	Work Confirmation	My Planned Work	View planned work assignments.	Employee	Core
48	SCR-048	My Workspace	Work Confirmation	Confirm Work	Confirm planned work or report deviations.	Employee	Core
49	SCR-049	Planning	Work Confirmation	Manager Review	Review confirmations and deviations.	Managers	Core
50	SCR-050	Planning	Work Confirmation	Planning Accuracy	Analyze planning deviations.	Management	Analytics

Module 11 – Executive Cockpit

Sr. No.	Screen ID	Menu	Sub Menu	Screen Name	Purpose	Primary Users	Remarks
51	SCR-051	Home	Cockpit	Executive Overview	Primary executive landing page.	CEO, Leadership	★★★★★★
